"What is an educational institution?"

"After more than fifty years' experience in teaching at various levels, secondary, junior college, senior college, in institutions of different degrees of opulence, different types of students and widely differing curricula, I can state quite definitely what it is not. An education is not primarily buildings or equipment or curricula. The primary requisite of an educational institution is people. There must be a body of students most of whom fundamentally desire to grow to their full stature as human beings. Quite as important, if not fully important, there must be a staff of teachers skilled in imparting knowledge of specific subjects including several teachers especially talented in the art of stirring the imagination, arousing ambition, and quickening the will.

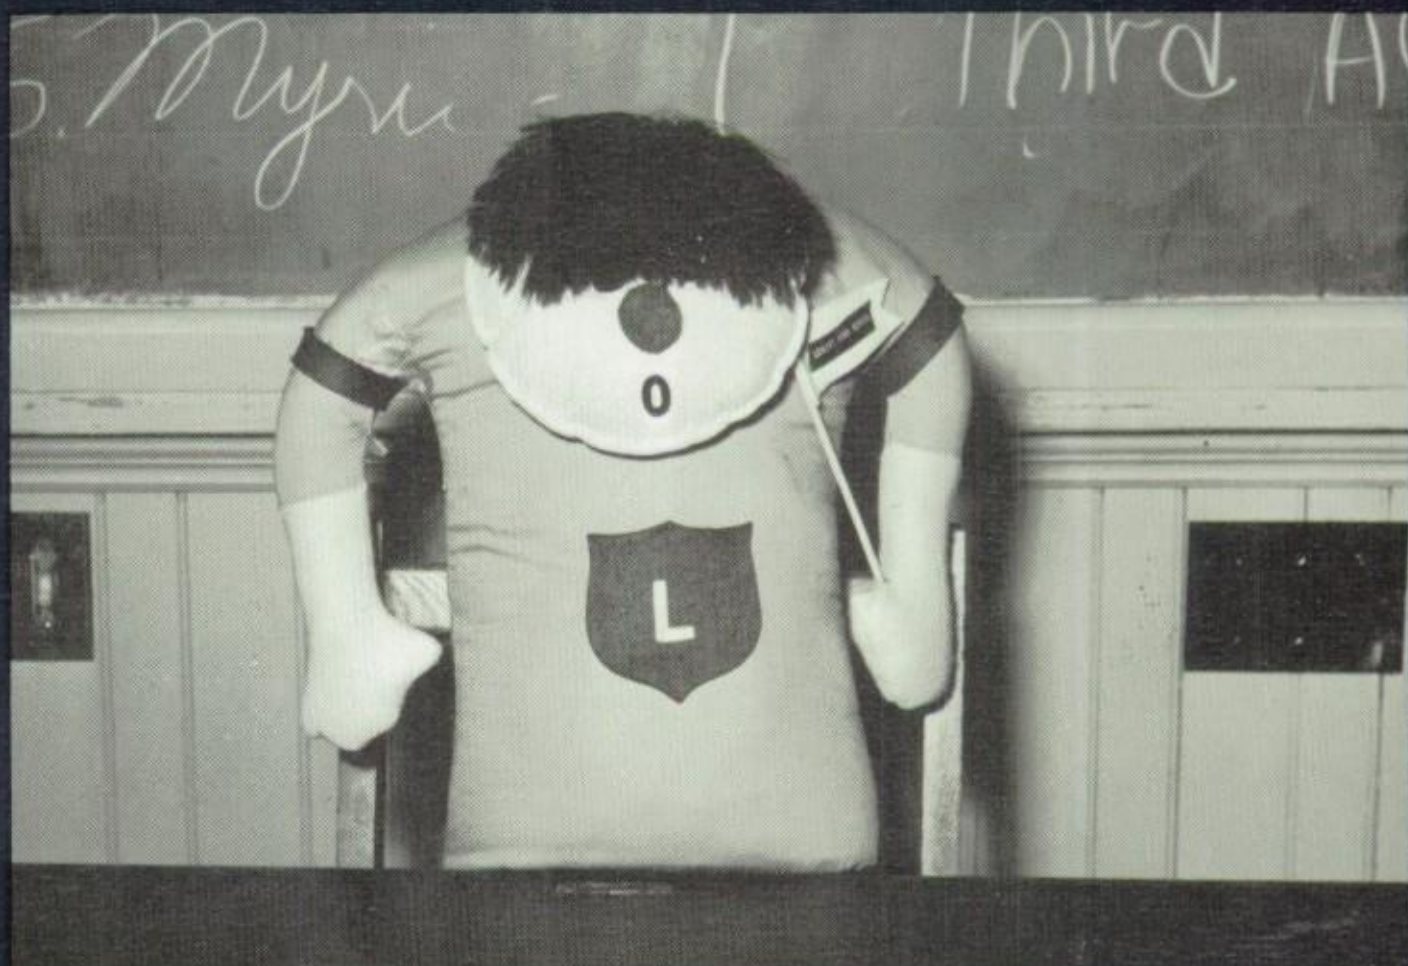

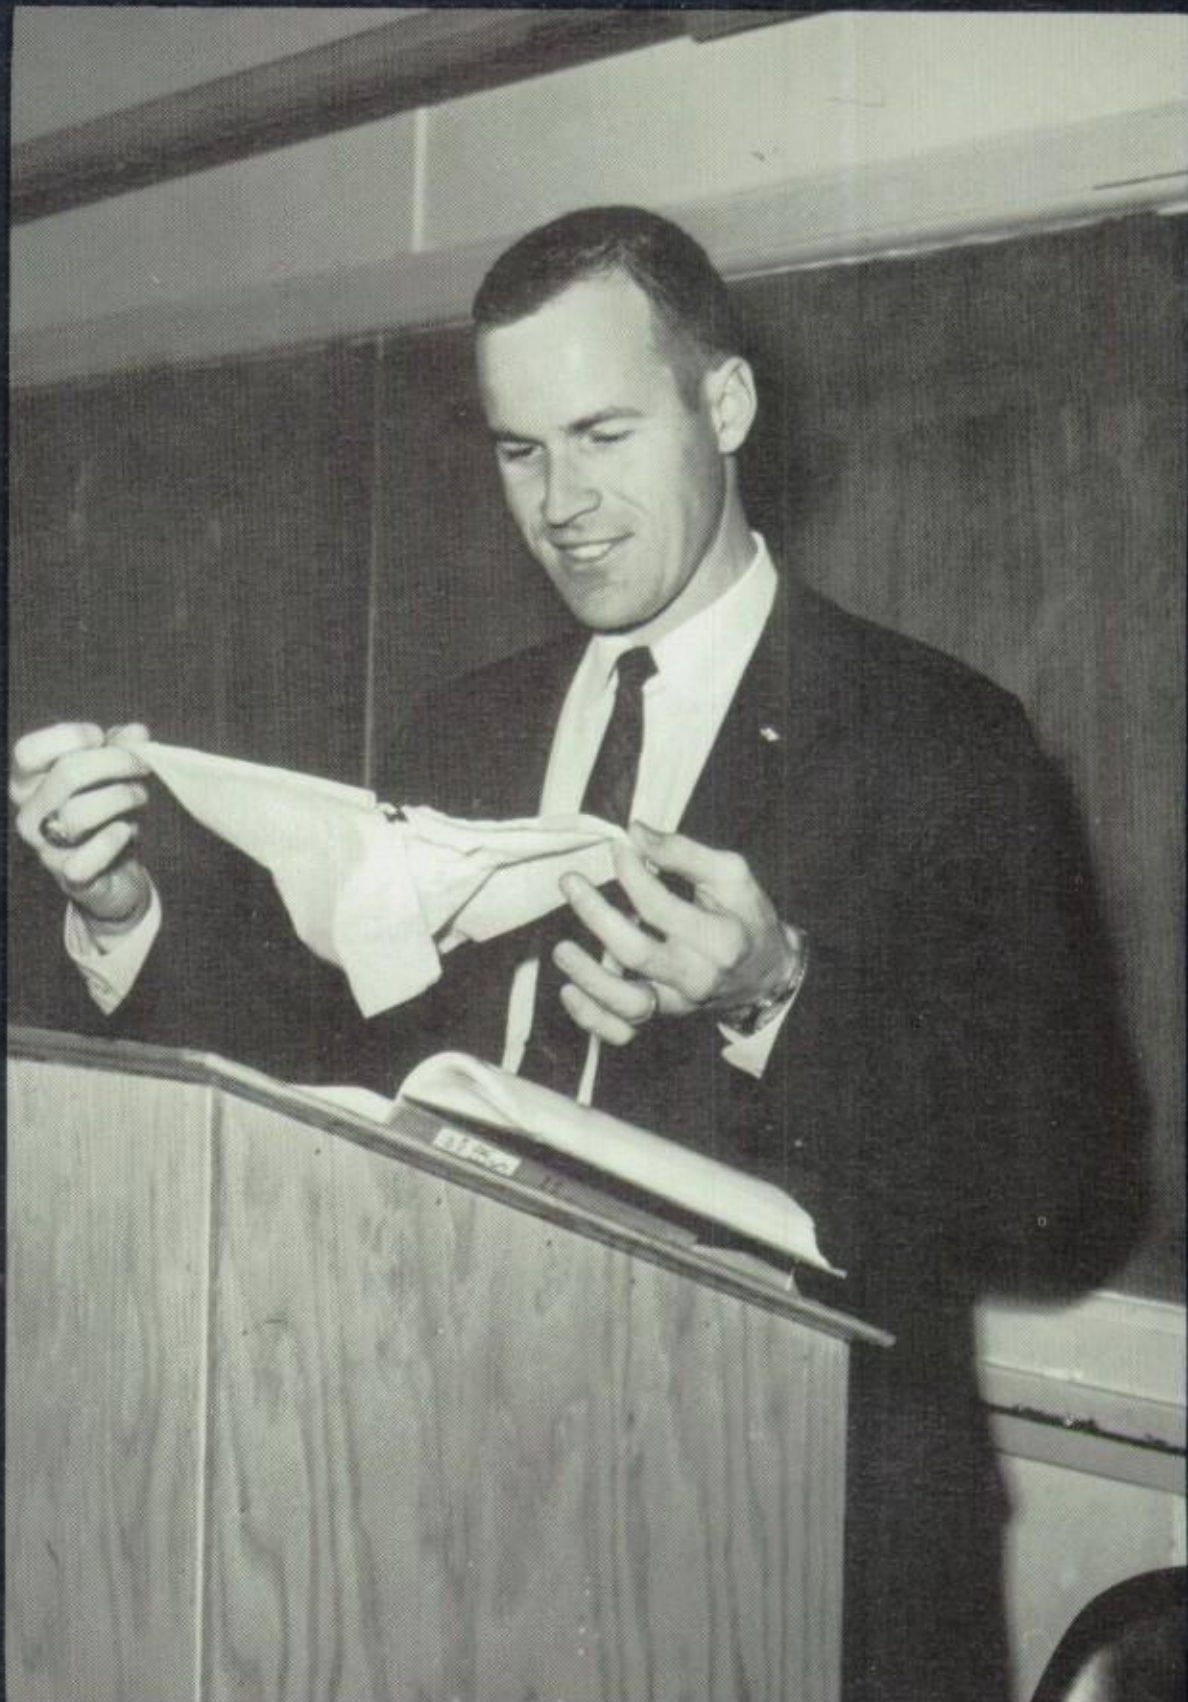

"May the new Leavitt High School soon to be become the home of an educational institution of high order. And to that end may many of her especially gifted students through successive generations choose and prepare for the high calling of teacher and may many of the especially talented of these choose to return to Leavitt to kindle unquenchable fires in the minds and the hearts of their students."

"He'd rather spend his gold on books than food,
Or on gay clothes or fun, as others would.
Of ethics and philosophy he read,
Kept Aristotle right beside his bed.
He seldom spoke; but what he said was clear,
And full of sense, so that you wished to hear;
Of high ideals and virtue was his speech;

And gladly would he learn, and gladly teach."

the class of 1968 sincerely wishes
to dedicate the '68 ANGELUS to
Dr. Luther Bonney
